Guidelines Related to Accidents

The Ateneo de Zamboanga University (ADZU) requires all members of the community to comply with general safety regulations as well as specific procedures and policies set by individual departments and colleges in relation to the conduct of all school activities. The following guidelines and procedures in responding to and reporting accidents are hereby set forth:

Responding to Accidents

1. The teacher should immediately call the clinic (4800) and stay with the injured student until an infirmary personnel arrives to assess the seriousness of the injury. A student should not be sent on his own to the clinic, no matter how minor the injury may seem.

2. If hospitalization is needed, clinic and DSA personnel should accompany the student. A student should not be left on his own to go to the hospital. Sometimes injury may not appear serious until closer scrutiny at the hospital.

3. In cases where an accident occurs after 5:00 P.M. and hospitalization is required, the clinic personnel should accompany the injured student.

4. Parents must be informed as soon as possible about the accident, preferably by the teacher, if not, by the clinic personnel or the DSA. The clinic personnel should stay with the student at the hospital until the parents arrive.

5. In all cases, teachers, deans, staff concerned should show utmost concern for the students and the parents. The law dictates that when under our care, we must exercise due diligence (expected of a parent) where the welfare of our students are concerned. We are not to leave the students on their own and make them feel abandoned.

6. The DSA must provide the parents with information about insurance coverage.

Follow-up Actions

7. The teacher should check the status of the student especially if the student does not return to class on the next class day. If confined at the hospital, or if surgery has been performed, the teacher should pay a visit.

8. The DSA shall provide the insurance form to the parent, retrieve the filled-up form, and forward it to the Finance Office.

9. The Finance Office shall process the insurance application form and shall notify the parents about developments in the application through the DSA.

10. In case additional financial assistance is sought, the DSA sets an appointment for the parents and the University Treasurer to discuss about the matter. The University Treasurer approves the amount to be covered by ADZU.

Reporting Accidents

11. Any accident should be reported immediately to the DSA as well as the College Dean who shall then forward the information to the AVP.

12. A written incident report, as clear as possible, should be submitted to the DSA and the College Dean (dean in-charge of faculty and injured student). The College Dean decides whether or not a copy of the incident report will be forwarded to the AVP.

Other Related Matters

13. For PE classes where possibility of accidents is high, parents' permission should be secured at the beginning of classes. It should be clear to students that they have the option to transfer to other PE classes that may involve lesser risk.
